

# Geberit Mapress Edelstahl Passbogen

## TECHNISCHE DATEN

Werkstoff

CrNiMo-Stahl 1.4401 (DIN EN

10088)

| Art-Nr.                                                                      | DN  | d ø<br>mm | arc<br>° | H<br>cm | H1<br>cm | K<br>cm | K1 max.<br>cm | VE1<br>St | VE2 | VE3 |
|------------------------------------------------------------------------------|-----|-----------|----------|---------|----------|---------|---------------|-----------|-----|-----|
| Dieser Artikel passt zum System: <b>Geberit Mapress Therm</b>                |     |           |          |         |          |         |               |           |     |     |
| 30011                                                                        | 100 | 108       | 15       | 11.7    | 25.4     | 0       | 13.7          | 1         |     |     |
| Dieser Artikel passt zum System: <b>Geberit Mapress Edelstahl</b>            |     |           |          |         |          |         |               |           |     |     |
| 30011                                                                        | 100 | 108       | 15       | 11.7    | 25.4     | 0       | 13.7          | 1         |     |     |
| Dieser Artikel passt zum System: <b>Geberit Mapress Edelstahl (FKM blau)</b> |     |           |          |         |          |         |               |           |     |     |
| 30011                                                                        | 100 | 108       | 15       | 11.7    | 25.4     | 0       | 13.7          | 1         |     |     |
