

# Geberit Mapress Edelstahl Passbogen

## TECHNISCHE DATEN

Werkstoff

CrNiMo-Stahl 1.4401 (DIN EN

10088)

| Art-Nr.                                                                      | DN | d, ø<br>mm | arc<br>° | H<br>cm | H1<br>cm | K<br>cm | K1 max.<br>cm | VE1<br>St | VE2<br>St | VE3 |
|------------------------------------------------------------------------------|----|------------|----------|---------|----------|---------|---------------|-----------|-----------|-----|
| Dieser Artikel passt zum System: <b>Geberit Mapress Therm</b>                |    |            |          |         |          |         |               |           |           |     |
| 30406                                                                        | 32 | 35         | 90       | 7.7     | 15.4     | 0       | 7.7           | 1         | 5         |     |
| Dieser Artikel passt zum System: <b>Geberit Mapress Edelstahl</b>            |    |            |          |         |          |         |               |           |           |     |
| 30406                                                                        | 32 | 35         | 90       | 7.7     | 15.4     | 0       | 7.7           | 1         | 5         |     |
| Dieser Artikel passt zum System: <b>Geberit Mapress Edelstahl (FKM blau)</b> |    |            |          |         |          |         |               |           |           |     |
| 30406                                                                        | 32 | 35         | 90       | 7.7     | 15.4     | 0       | 7.7           | 1         | 5         |     |

| Art.-Nr.                                                                | DN | d, ø<br>mm | arc<br>° | H<br>cm | H1<br>cm | K<br>cm | K1 max.<br>cm | VE1<br>St. | VE2<br>St. | VE3 |
|-------------------------------------------------------------------------|----|------------|----------|---------|----------|---------|---------------|------------|------------|-----|
| Dieser Artikel passt zum System: <b>Geberit Mapress Edelstahl (Gas)</b> |    |            |          |         |          |         |               |            |            |     |
